1Description2Sony E Lens Mount320.1 MP Exmor APS HD CMOS Sensor and BION' X Image Processor4Full HD Video Recording5Built-In Wi-Fi Connection with NFC6Other Camera FeaturesConvert your smartphone into a replacement lens camera with Sony's iICE-X1 Mirrorless Objective Digital Camera. This model features the Sony E lens mount along with a 20.1-megapixel APS-C Exmor APS HD CMOS sensor and BION' X imaging processor to provide detailed images and full high-definition video at 30p. This camera also has a built-in flash with a 13' guide number to work in low light. In addition to these shooting capabilities, x1 has the ability to record RAW image files for use with advanced editing techniques. It can also shoot continuously at 3.5 frames per second to 15 frames and uses a 25-ton contrast detection system to quickly capture sharp images. This system can lock on moving objects. The X1 system has built-in Wi-Fi that connects to your iOS or Android smartphone and uses the PlayMemories mobile app to turn your phone into a viewer and control the camera menu. With Android smartphones, NFC (Near Field Communication) provides Wi-Fi connectivity with a simple click between your phone and your camera. In addition, with the wi-Fi connection enabled, you can use your smartphone as a remote control and shoot with a camera separated from your smartphone. In addition, the zoom lever and the shutter button on the camera allow you to shoot without a smartphone and view the images later. The camera can use Stick Micro memory, Memory Stick Micro Mark II and microSD and microSDHC memory cards to store images. Allows you to work with a wide range of interchangeable Sony lenses. You can use all E-mounting lenses and, with an additional adapter, A-mount lenses. This allows you to achieve the unique look and effect you need to create the photo you desire. The Exmor APS CMOS sensor measuring 20.1 MP APS and the BION'X imaging processor work together to get high resolution, detailed images with minimal noise and noticeable low light quality and sensitivity to ISO 16000. The processor also contributes to ensuring a wealth of speed throughout the camera system, including a fast 25-point contrast detection AF system, a top continuous shooting speed of 3.5 frames per minute, and a full HD 1080p video recording in multiple frame rates. Full HD 1080p video recording is supported by 30 fps for high-resolution movies with a sleek, cinematic look. The video is recorded in MP4 format and the sound of built-in stereo microphone recordings. Built-in Wi-Fi connectivity allows you to connect to a mobile device to view live vision and change settings, as well as instantly share images with mobile devices for direct sharing online on social networks, according to mail and cloud storage. Nfc (Near Field Communication) is also supported, which provides a one-touch connection between the camera and compatible mobile devices; There is no complex complex требуется. Запись файла RAW возможна для передовых методов редактирования. Встроенная вспышка доступна для обеспечения дополнительного освещения при работе в тусклом освещении. Удобная зарядка USB позволяет заряжать включенную литий-ионную батарею в камере через USB-соединение либо из розетки переменного тока, либо из источника ПК. Сохраняет файлы на карты памяти microSD и Memory Stick Micro. До 440 выстрелов на одном заряде батареи. Трипод нить в нижней части камеры. Choose a macro lens to get closer to smaller objects, or create beautiful defocus backgrounds or 'bokeh' with a simple lens. You can even choose a telephoto lens, complete with optical image stabilization SteadyShot™, bringing your subject closer with precision for pro-style finishes. Take dSLR-worthy photos with a lens-style camera. The huge APS-C Exmor image sensor™ CMOS works with the BION™ X processor to produce 20.1MP high-precision images. Capture small details, clear images, vibrant nightscapes, and beautiful bokeh - all from your smartphone. Sony's image processing engine accurately reproduces textures and details, as seen with the naked eye, with additional high-speed processing. Together with the frontal LSI (large-scale integration) that speeds up processing, BION™ allows for more natural details, more realistic images, richer tonal gradations and lower noise, whether you're shooting photos or movies. Take great shots - even in low light - with a built-in flash. Thanks to the GND rating, you will get reliable and accurate shooting in dark conditions where noise and blur can occur. Lighting situations and night photos are not a problem either, and you get the perfect focus when using Superior Auto mode. There's no shoot too challenging. Superior Auto mode automatically recognizes different types of environments and accordingly camera settings to optimize each shot. You camera activates features such as continuous shooting and Auto HDR when conditions are challenging, so you can capture the shot with ease. Enjoy freedom of freedom manual control. This lens-style camera is equipped with P/A/S modes, giving you control over the aperture, shutter speed and more. The result is beautiful photos with pro-style finishes right from your smartphone. It's easy to transfer movies and more from your camera to your android or iOS smartphone or tablet just by connecting to Wi-Fi. Then quickly upload the video to your favorite websites and social networks so friends and family can see the action. Turn your smartphone or tablet into a remote commander and enjoy easy camera control, thanks to Imaging Edge Mobile. The clean user interface gives you a simple one-handed performance of all camera settings - including exposure, shutter release and zoom - making it ideal for group photos. Find out more From different perspectives. Bring the camera in the style of a lens in previously difficult to reach places, and then take control - including zoom, framing, and capture - using a mobile device. Keep a solid grip for all-round shooting with an optional free angle shooting kit (ADP-FSK1). Never worry about losing your shots - your photos are automatically saved both in the camera style lens and your smartphone or tablet as you take them. Simply install the Imaging Edge Mobile app to export photos from your camera to your smartphone or tablet via Wi-Fi. From there you can organize, edit and share with friends and family, or upload to your favorite social networking site and share with the world. Find out more with five cameras with an additional Live View Remote. Check the viewing angles on the color monitor mounted on your wrist at a glance, start/stop the recording on five cameras at once and change settings on all devices at the same time. No cables are required, thanks to the built-in Wi-Fi.Shoot long exposures and stunning scenery with complete confidence. Just mount a lens-style camera on a tripod and get more stability than you would with portable shots. Tricky terrain, low-light photography, and group shots all become easier when you plug the lens-style camera tripod. Take photos that stand out from the crowd with a choice of different side ratios. Choose from regular digital photo forms such as 3:2 and 4:3, as well as 16:9 widescreen or square for third images exactly the way you want them. Watch your photos and videos in rich, natural color as you share them on the big screen. This lens-style camera supports Sony's TRILUMINOS color technology - see your favorite images in realistic color when you watch them on your TRILUMINOS TV. Extended color scheme means red, aqua blues and emerald greens, beautifully displayed for bright landscapes. The faces look better, too, thanks to the natural replication of skin tones. From dark shadows to Glare - Auto HDR (High Dynamic Range) captures every tone gradation in the scene. It works by expanding the dynamic range of your images to produce a clear, striking contrast. When taking pictures of fast-moving switch to DRO (D-Range Optimiser) for a more natural contrast. Get crystal clear photos that are always in the spotlight. Autofocus Lock (AF) automatically adjusts the size of the target frame depending on the characteristics of the objects. This allows you to focus on what your subject is doing, while the camera ensures that you get a focus shot no matter what happens. Capture One Express (for Sony) is one of the world's best RAW converters, making precise colors and incredible details. It contains flexible digital asset management, all the necessary adjustment tools, and quick, responsive performance in one customizable and integrated solution. Please enable all requests to buy, use and support Capture One solutions for Phase One.Free Download (Go to the first phase of the website) The new lens-style camera captures images that are usually only possible with a replacement camera lens. Thanks to the CMOS 20.1MP Exmor APS-HD sensor, You can capture striking details with beautiful defocusing using your smartphone or tablet.20.1MP Exmor® APS-C type CMOS sensor BION' X engine for superb detail and noise-cancelling shoot and share high-quality images with your iOS and Android device AVCHD the ability to record for a beautiful video lensSonysony E-mount lensesSensor Type Exmor™ CMOS sensorNumber of Pixels (Effective)20.1MPISO Sensitivity (Recommended Exposure Index)ISO 100-16000Battery Life (Still Images) Up to 440 shots sony alpha ice-qx1. sony alpha ice-qx1. sony smartshot ice-qx1. sony ice qx1 price in india. sony ice qx1 price in bangladesh. sony ice qx1 buy online. sony ice-qx1 for sale. sony ice-qx1 price
